demandbridge®

DEMANDBRIDGE COMMERCE

Customer ordering with control behind it.

DemandBridge Commerce helps print and promo distributors support company stores, controlled ordering programs, approved products, permissions, brand guardrails, and approval workflows.

BUILT AROUND CUSTOMER ORDERING

Company Stores

Support customer-specific ordering experiences with approved products, program rules, and structured access.

Brand Control

Help customers maintain consistency with approved products, brand guardrails, permissions, and controlled ordering paths.

Approval Workflows

Route ordering activity through review and approval steps that support customer program requirements.

Customer-Specific Access

Manage ordering experiences by user, location, department, program, or customer account structure.

CONNECTED TO THE OPERATION BEHIND THE ORDER

Behind every Commerce experience are customer details, approved products, inventory needs, fulfillment requirements, billing workflows, and support processes. DemandBridge Commerce works with DemandBridge ERP to help keep customer ordering connected to the operational workflows that move orders through the business.
