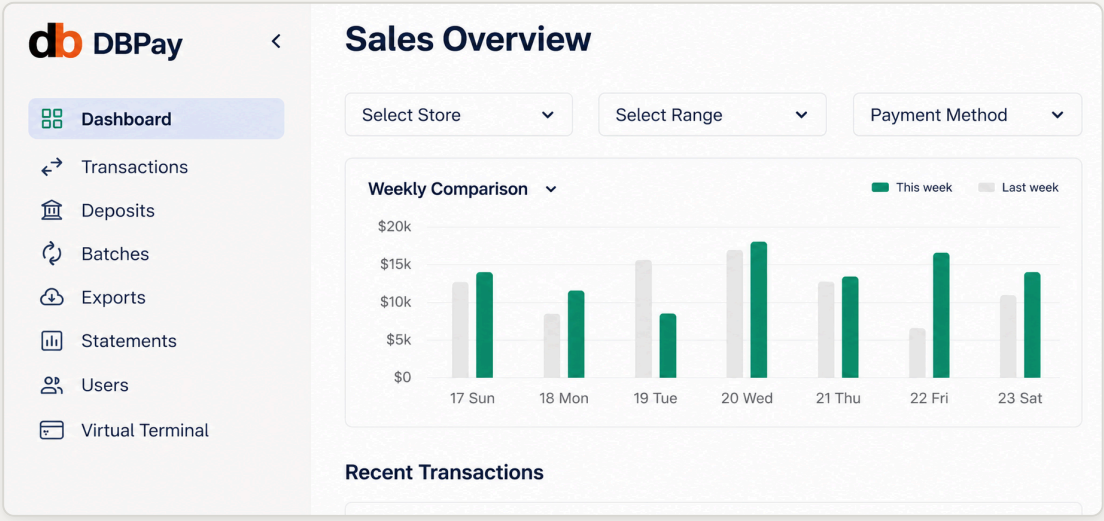
demandbridge®

DBPAY

Connected payments for distributor operations.

DBPay helps businesses collect payments through connected payment experiences that support customer, billing, and operational workflows. From secure payment links to payment visibility, DBPay helps keep payment activity connected to the work behind every transaction.



BUILT AROUND CONNECTED PAYMENTS

Accept Payments

Provide customers with a convenient way to submit payments through connected payment experiences. DBPay helps support secure payment collection while keeping payment activity connected to everyday business processes.

PayByLink

Send secure payment links that allow customers to complete payments online. PayByLink provides a simple payment experience without requiring customers to log into a portal, helping businesses collect payments more efficiently.

Connected Payment Workflows

Keep payment activity connected to customer information and operational workflows. DBPay helps businesses manage payment activity alongside the customer and billing information they already use every day.

Secure Payment Experience

Support payment collection through established payment-processing practices designed to provide a secure and reliable payment experience.

CONNECTED TO THE BUSINESS BEHIND THE PAYMENT

Payment collection is only one part of the customer journey. DBPay complements DemandBridge products by helping connect payment activity with customer information and the operational workflows that support day-to-day business.
