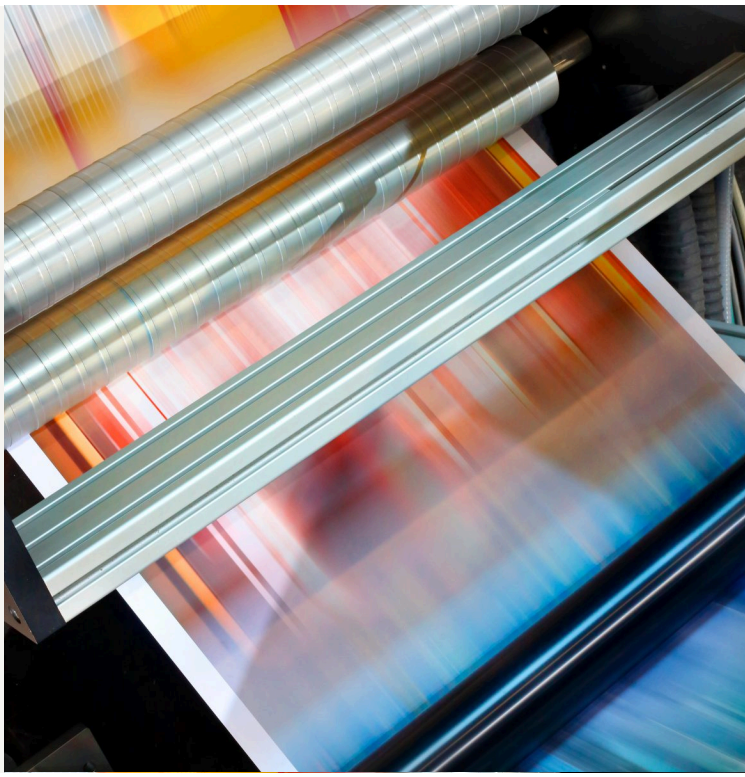
demandbridge®
DEMANDBRIDGE ERP

Manage distributor operations from order to billing.

DemandBridge ERP helps print and promo distributors manage orders, purchasing, inventory, fulfillment, billing, customer management, and supplier relationships in connected workflows.



BUILT AROUND DISTRIBUTOR WORKFLOWS

Order Management

Manage customer orders and the operational details that move work from intake through fulfillment and billing.

Purchasing & Suppliers

Support purchasing workflows, supplier relationships, and the information teams need to keep orders moving.

Inventory & Fulfillment

Coordinate inventory and fulfillment workflows so teams have clearer visibility into what needs to happen next.

Billing & Customer Management

Keep billing, customer information, and account-related workflows connected to the order process.

CONNECTED TO CUSTOMER ORDERING

DemandBridge ERP helps manage the operational work behind each order, while DemandBridge Commerce supports company stores, controlled ordering programs, approved products, permissions, and approval workflows. Together, ERP and Commerce help keep customer ordering connected to fulfillment, billing, and day-to-day distributor operations.
